

Applications:

Internal and external strip lighting
 Shelter lighting
 Back illumination
 Cove lighting
 Up and down lighting
 Refrigerator cabinets

Options:

Colour temperature selection – CW,NW,WW
 Bespoke lengths available

Specification:

Size	1000 x 40.5 x 12.5mm
Power	8W
Colour	R,G,B,Y,W,WW, RGB
Input voltage	24V
Driver	Suited to installation 30W – 150W 24v Hpf driver
Viewing angle	120°
Operating temperature	-40°C – +80°C
Lifetime	>40,000 (minimal degradation)
Resistance level	IP65
Surface illumination	3500 Lux

The Zeta **MM Strip Light** has been designed and manufactured to offer a rugged solution for internal and external linear lighting.

Current installations include bus and rail shelter, refrigerator cabinet lighting, internal cove up lighting and signage illumination. This multi-functional light bar can be used to replace energy intensive fluorescent tubes across a wide range of applications.

Running at 8W energy and especially maintenance savings can be seen to a high level with an estimated life of >40,000 hours.
